'*Drifting Matters*' is the MFA graduation show encompassing the individual works from the 16 students graduating from the departments under the Faculty of Art & Craft at the Oslo National academy of the Arts.

The title of the show refers to the challenging times the students have been put through while preparing and finalising their graduation works during the pandemic. More precisely, '*Drifting Matters*' points to a sense of aimless movement – a wandering feeling, that has characterized their practices and daily lives throughout the past year. The MFA graduation show '*Drifting Matters*' seeks to beam a light of hope into the future challenges; where the unknown currents and forces revail the uncertain realities we live in, we must never be powerless or lose our inquisitive and creative minds.
